This might be a good game with a nice story BUT I can't tell at all 'cause I am not able to master or get used to the battle system. It's just a nightmare for me and it's not enjoyable in the slightest if I get frustrated with the fight mechanics. I also know that this is solely on me but the battle system is not intuitive for me playing it on my laptop without a mouse.

Positive about this game is that you can fish, farm, craft items, finish quests and unlock music while visiting different areas.

Maybe others will like it and I would rather give it a neutral review if that was possible.
